

PPN 06/21 Carbon Reduction Plan

Supplier name: ...Lavender Medical Ltd.....

Publication date: 20/09/2026

Commitment to achieving Net Zero

Lavender Medical Ltd is committed to achieving Net Zero emissions by 2040.

Baseline Emissions Footprint

Baseline emissions are a record of the greenhouse gases that have been produced in the past and were produced prior to the introduction of any strategies to reduce emissions. Baseline emissions are the reference point against which emissions reduction can be measured.

Baseline Year: 2022	
Additional Details relating to the Baseline Emissions calculations.	
No previous baseline	
Baseline year emissions:	
EMISSIONS	TOTAL (tCO₂e)
Scope 1	64.3
Scope 2	3
Scope 3 (Included Sources)	78.2
Total Emissions	145.5

Current Emissions Reporting

Reporting Year: 2025	
EMISSIONS	TOTAL (tCO ₂ e)
Scope 1	45.31
Scope 2	0
Scope 3 (Included Sources)	121.26
Total Emissions	166.57

Emissions reduction targets

In order to continue our progress to achieving Net Zero, we have adopted the following carbon reduction targets.

We project that carbon emissions will decrease over the next five years to **91.6 tCO₂e** by **2030**. This is a reduction of **45%**

Our long-term commitment is to achieve a 100% reduction in Scope 1 and 2 emissions by 2040, followed by a 100% reduction in Scope 3 emissions by 2045.

Progress against these targets can be seen in the graph below:

Carbon Reduction Projects

Completed Carbon Reduction Initiatives

The following environmental management measures and projects have been completed or implemented using the 2022 baseline to reduce carbon emissions.

Prior to the Carbon reductions plans we have implemented the ISO 14001 standards with positive environmental objectives. Certificate number: 413772023

In the future, we hope to implement further measures such as:

Achieving net zero carbon by 2040. To achieve this, we have measured the baseline carbon footprint for 2022 (from 1st January to 31st December), following the international standard BS EN ISO 14064-1. We will monitor its carbon footprint annually, following the NHS framework, and adjust its roadmap accordingly based on the changes in its direct and indirect emissions.

In the future we hope to implement further measures such as:

- Committing to science-based emissions reduction targets through the Science Based Targets initiative (SBTi).
- Installing energy-efficient electric heating systems and solar panels.
- Increasing the proportion of electric vehicles within our fleet.
- Adopting cleaner logistics and transportation solutions to reduce CO₂ emissions associated with shipping.

Declaration and Sign Off

This Carbon Reduction Plan has been completed in accordance with PPN 06/21 and associated guidance and reporting standard for Carbon Reduction Plans.

Emissions have been reported and recorded in accordance with the published reporting standard for Carbon Reduction Plans and the GHG Reporting Protocol corporate standard and uses the appropriate Government emission conversion factors for greenhouse gas company reporting.

Scope 1 and Scope 2 emissions have been reported in accordance with SECR requirements, and the required subset of Scope 3 emissions have been reported in accordance with the published reporting standard for Carbon Reduction Plans and the Corporate Value Chain (Scope 3) Standard.

This Carbon Reduction Plan has been reviewed and signed off by the board of directors (or equivalent management body).

Signed on behalf of the Supplier:
